Professional Summary

GenAI / LLM Engineer with 2+ years building production LLM applications and APIs: copilots, code assistants, and agentic workflows using FastAPI/Flask, LangGraph/LangChain, RAG over pgvector, and OpenAI APIs. Strong Python fundamentals; shipped streaming SSE experiences, prompt engineering, token usage optimization, and low-latency services on AWS with CI/CD and SQL performance tuning.

Experience

Tap Academy

March 2025 – Present

Full Stack Engineer

Bangalore, Karnataka

- Built production LLM-powered code assistant with OpenAI APIs, optimized prompts, token management, and SSE streaming for real-time suggestions.
- Packaged LLM features as FastAPI/Node.js services and integrated AI-driven feedback loops into a React learning platform.
- Optimized PostgreSQL and MongoDB through indexing and query restructuring, reducing average API response time by 35%.
- Implemented robust frontend state management (Redux, React Router) to enable responsive, low-latency AI interactions.

Quanta

July 2024 – Feb 2025

Software Development Engineer 1

Bangalore, Karnataka

- Built scalable async FastAPI and Flask microservices for real-time synchronization and low-latency collaboration.
- Designed production-grade MySQL schemas and integrated third-party APIs to support high-throughput backend workloads.
- Developed modular, reusable Python services to accelerate delivery across multiple systems and codebases.

Visionet Systems

Feb 2024 – Jul 2024

Software Developer Intern

Bangalore, Karnataka

- Built reusable AWS cloud component and modular Python data-processing solutions with optimized SQL queries, improving pipeline scalability and data integrity.

Projects

AI Fitness Coach (LangGraph, FastAPI, pgvector, React Native, OpenRouter, Mem0)

2025

- Engineered an agentic AI backend with LangGraph and 8 domain tools; implemented parallelized context loading with Mem0 + pgvector to cut first-token latency by 40%.
- Delivered real-time SSE streaming and server-side rate limiting for consistent, low-latency interactions on mobile.

AI Code Editor (LLM, FastAPI, React, Node.js)

Aug 2024

- Built low-latency services for AI code suggestions, debugging, and contextual completions using FastAPI and LLM APIs.
- Optimized prompt-processing and caching, reducing token usage per request by 30%.

Skills

- **GenAI / LLM** LangGraph, LangChain, RAG, LLM Integration, Agentic Workflows, pgvector, Prompt Engineering, SSE Streaming, Mem0
- **Backend & APIs** FastAPI, Flask, Node.js, RESTful APIs, WebSockets, Microservices
- **Languages** Python, JavaScript, TypeScript
- **Databases** PostgreSQL, MySQL, MongoDB
- **Cloud & DevOps** AWS, CI/CD, Firebase, Supabase
- **Frontend** React, React Native, Redux, Zustand, Tailwind CSS

Education

Presidency University

2020–2024

B.Tech Computer Science & Engineering (Data Science) – CGPA 7.95

Bangalore, Karnataka
