Professional Summary

Backend Engineer with 2+ years building scalable backend systems, real-time APIs, and GenAI applications using FastAPI/Flask, PostgreSQL, pgvector, and AWS. Experienced in async microservices, RAG, agentic workflows, streaming (SSE), and performance optimization for production workloads.

Experience

Tap Academy

March 2025 – Present

Full Stack Engineer

Bangalore, Karnataka

- Built production LLM-powered AI code assistance using OpenAI APIs with optimized prompt engineering, token management, and SSE streaming.
- Architected full-stack learning platform with React + FastAPI/Node.js, integrating AI-driven feedback loops for student code submissions.
- Optimized PostgreSQL and MongoDB queries through indexing and query restructuring, reducing average API response time by 35%.

Quanta

July 2024 – Feb 2025

Software Development Engineer 1 (SD1)

Bangalore, Karnataka

- Built scalable async FastAPI and Flask microservices for real-time synchronization and low-latency concurrent collaboration.
- Designed production-grade MySQL schemas and integrated third-party APIs for scalable backend workloads.
- Developed modular reusable backend services, accelerating feature delivery across multiple systems.

Visionet Systems

Feb 2024 – Jul 2024

Software Developer Intern

Bangalore, Karnataka

- Built reusable AWS cloud component and modular Python data-processing solutions with optimized SQL queries, improving pipeline scalability and data integrity.

Projects

AI Fitness Coach | LangGraph, FastAPI, React Native, pgvector, OpenRouter

2025

- Built agentic AI backend with LangGraph and 8 domain-specific tools; implemented parallelized context loading using Mem0 and pgvector to cut first-token latency by 40%.
- Developed real-time SSE streaming and server-side rate limiting for low-latency interactions across the mobile app.

AI Code Editor | LLM, FastAPI, React, Node.js

Aug 2024

- Built low-latency backend services for AI-powered code suggestions, debugging, and contextual completions using FastAPI and LLM APIs.
- Optimized prompt-processing pipelines and caching strategies, reducing token usage per request by 30%.

Skills

- **AI/ML** LangGraph, LangChain, LLM Integration, RAG, Agentic Workflows, pgvector, Mem0, Prompt Engineering, SSE Streaming
- **Languages** Python, JavaScript, TypeScript
- **Backend** FastAPI, Flask, Node.js, Prisma
- **Frontend** React, React Native, Expo, Redux, Zustand, Tailwind CSS
- **Databases** PostgreSQL, MongoDB, MySQL, pgvector
- **Cloud** AWS, Firebase, Supabase
- **Other** RESTful APIs, WebSockets, Microservices, SQL Optimization, CI/CD

Education

Presidency University

2020–2024

B.Tech Computer Science & Engineering (Data Science) – CGPA 7.95

Bangalore, Karnataka
